CM																																																											
Menses																																																											
SI																																																											
OPT																																																											
Cervix																																																											
Notes																																																											

CM: Cervical Mucous : T=thick/sticky D= dry E= eggwhite **Menses:** H=heavy C= clotted L=light S=spotting P=painful (use any combination of these to describe)

SI = sexual intercourse **OPT** = Ovulation prediction test kit **Cervix:** H = high L = low

Please note down any other main symptoms such as illness, insomnia, or major stresses for that day as these may affect temperature readings

Basal body temperatures should be taken at the same time daily, and immediately upon waking up in the morning, before stirring. If less than 4 hrs continuous sleep please note on chart.
